

First Aid at Work + AED Initial - FAIB Approved

First Aid trained personnel at the workplace is a requirement of Health & Safety law. First Aiders can act to prevent situations becoming worse and can reduce potential sick leave through prompt emergency action. They will be able to use provided First Aid equipment and an AED (Automatic External Defibrillator) with confidence.

Cost: From £1195 for up to 12 students on your site

Course length: 3 days

This course is for: Nominated personnel to become First Aiders in the Workplace to comply with the Health & Safety (First Aid) Regulations 1981.

Certificate: A 3 year Certificate of Competence (FOFATO Approved) will be awarded on successful completion of the course and assessment.

For bookings contact: Nigel Sivyer Tel: 01322 666 404, Mobile 07960 937 120, Email info@firstaidcourses.co.uk

Aims

To enable students to get help & give safe, prompt & effective First Aid to a casualty in the workplace following an injury or illness using materials to hand including an AED and HSE approved first aid equipment.

Objectives

On successful completion of the syllabus, each student will be able to demonstrate that they are able to:

- act safely, promptly and effectively with emergencies at work
- use first aid equipment, an AED and the contents of a first aid box
- understand the duties of employers and the legal framework
- maintain simple factual records on what they have done with regard to any treatment or management of an emergency
- recognise the importance of personal hygiene in first aid procedures.

They will also be able to deal with a casualty who:

- requires cardiopulmonary resuscitation+AED
- is unconscious;
- is bleeding or wounded
- is suffering from shock
- is suffering from an injury to bones, muscles or joints
- has been burned or scalded;
- has an eye injury;
- has been overcome by gas or fumes; or may have been poisoned or exposed to a harmful substance.

They will be able to:

- recognise major illnesses and take appropriate action
- recognise minor illnesses and take appropriate action
- manage the transportation of a casualty, as required by the circumstances of the workplace.
